

Reynard Antibacterial hand wipes.

The antimicrobial formula contains alcohol and moisturisers to remove harmful bacteria while maintaining the skin's natural pH balance. Each wipe is individually wrapped in an easy tear sachet for infection control friendly use.

When to wash your hands:

- Anytime your hands come into contact with your face e.g., eating, drinking, taking medicine or smoking.
- After coughing, sneezing, scratching, or touching broken skin.
- Before entering or leaving a facility/area/room.
- After using the bathroom.
- Whenever hands are visibly dirty.

Rub your hands palm to palm

Rub the back of each hand with the palm of the other hand, with your fingers interlaced

Rub your hands palm to palm with fingers interlaced

Rub the back of your fingers

Rub each thumb with the other hand

Rub the tips of your fingers in your palm in a circular motion

Please note: we recommend following hospital patient cleaning protocols, including the use of P.P.E. where appropriate.
